**1. “Local boy does good: Home CEOs and the value effects of their CSR activities”** with Dimitris Petmezas (Durham), Zicheng Lei (KCL), and Raghavendra Rau (Cambridge)

*Abstract:* CSR activities conducted by CEOs heading firms located in their home birth counties increase firm value. Following CSR activity at firms managed by home CEOs, local employees are more productive, the firms earn higher sales growth, and charge higher markups than firms run by non-home CEOs. Strikingly, only firms with home CEOs that had conducted CSR activities earn higher stock returns during the 2008-2009 financial crisis and the COVID-19 pandemic periods, respectively. Overall, our results suggest that engaging in CSR will not necessarily increase levels of social trust and firm value. The place identity of the CEO also matters.

**2. “CEO personal reputation and financial misconduct”** with Dimitris Petmezas (Durham), Zicheng Lei (KCL), and Raghavendra Rau (Cambridge)

*Abstract:* We examine the effect of CEO personal reputational capital on financial misconduct. We find that home CEOs (defined as those who manage firms located within 100 miles of their birthplaces) are associated with significantly less misconduct than firms with non-home CEOs. However, home CEOs

also appear to rationally calculate the effect of corporate events on personal reputation. When their firms are financially distressed, home CEOs do not act differently from non-home CEOs in the levels of firm misconduct at their firms, perhaps because the catastrophic reputational damage of bankruptcy is higher than the reputational costs of engaging in financial misconduct.
